Summary

Senior Front-End Developer experienced in building dynamic web applications for B2B and B2C. Proficient in React, Vue.js, Angular, Next.js, and Svelte, with expertise in state management and testing tools. Track record of optimizing performance and user experience using GraphQL, Tailwind CSS, and AWS. Skilled in API integration, creating appealing designs, and leading agile development to deliver high-quality solutions.

Technology Expertise

Front-End Frameworks: React, Vue.js, Angular 2+, Next.js, Nuxt.js, Svelte, Backbone, Ember, React Native
State Management: Redux, Mobx, Vuex, Flux, Context API, Apollo Client
Programming Language: HTML5, CSS3, JavaScript (ES6+), TypeScript, Swift, Rust
Testing Tools: Jest, Mocha, Cypress, Selenium, Playwright
Build Tools: Babel, Webpack, Vite
Preprocessors: Sass, Less
Version Control: Git, GitHub, GitLab, Bitbucket, SVN, GitKraken
Back-End & Databases Familiarity: Node.js, Express.js, Python, Ruby, PHP, Go, Java, SQL, PostgreSQL
Design Tools: Sketch, Figma, Adobe XD, InVision, Canva
API Integration: REST API, Slack Integrations, GraphQL, Axios, WebSocket
UI Libraries: Tailwind CSS, Bootstrap, Material-UI, Ionic Framework, Telerik
Cloud Platforms: AWS S3, Firebase, Vercel, Netlify, GCP, Kubernetes, BigQuery, Pulumi
CMS & E-Commerce Platforms: WordPress, Shopify/BigCommerce, Magento, Contentful
Agile Tools: Jira, Slack Integration
Performance & Optimization: Scalability, Yarn, SEO
Data Visualization: D3.js, Chart.js, Highcharts, ECharts
DevOps & Monitoring: Docker, Circle CI, CI/CD Integration
Desktop Application Framework: Electron

Professional Experience

Netlify, San Francisco, CA   Apr 2022 – Jan 2025
Senior Front-End Developer

React, Vue.js, Angular, Node.js, Next.js, Nuxt.js, Redux, MobX, Context API, AWS, Webpack, Vite, Jest, Cypress, Git, Jira

- Led the creation of responsive web interfaces for AI-driven streaming platforms, boosting customer engagement by 60%.
- Updated legacy codebases with modern front-end practices, reducing application load times by 30%.
- Deployed scalable web solutions on AWS (S3, EC2, CloudFront) for high availability and performance.
- Implemented scalable design systems and integrated state management tools like Redux and MobX to improve efficiency and maintainability.
- Mentored junior developers to promote professional growth and uphold coding standards.

Artemis, Melbourne, FL   Oct 2019 – Mar 2022

Senior Front-End Developer

React, Angular, RESTful APIs, Webpack, Vite, Babel, Redux, Context API, RxJS, Jira, Trello, Jest, Playwright, Material-UI, Bootstrap, Tailwind CSS

- Engineered interactive and visually appealing user interfaces with React, Angular, and Tailwind CSS, improving customer satisfaction by 50%.
- Improved the performance of web applications by optimizing assets and implementing lazy loading.
- Integrated RESTful APIs with dynamic front-end components to deliver seamless user experiences.
- Architected a comprehensive plan to modernize front-end systems by implementing Vue.js and Tailwind CSS, enhancing the application's responsiveness and improving user satisfaction scores by 25% within three months.

Kitrum, Tampa, FL   Jul 2017 – Sep 2019

Front-End Developer

React, Vue.js, Next.js, Redux, Apollo Client, Webpack, Vite, Jest, Git, Jira, Slack integrations, RESTful APIs, GraphQL, Figma, D3.js, Chart.js

- Engineered dynamic, high-performance web applications using React, Vue.js, Next.js, and GraphQL for seamless user experiences across multiple platforms.
- Implemented state management solutions with Redux, Apollo Client, and GraphQL queries, optimizing performance and reducing app complexity.
- Optimized front-end builds by introducing Webpack and Vite, reducing load times by 35%.
- Built robust testing pipelines using Jest, Cypress, and Playwright, achieving over 90% code coverage across multiple projects.
- Enhanced accessibility and SEO, achieving WCAG compliance and improving website rankings by 50%.
- Delivered complex Agile sprints using tools like Jira and Slack integrations for team collaboration.

Clever, San Francisco, CA   Jul 2014 - Jun 2017

Junior Front-End Developer

Angular, Svelte, Bootstrap, Backbone.js, CSS3, Sass, Less, REST APIs, WebSocket, Git, Webpack, Mocha, Selenium

- Contributed to building feature-rich web applications with Angular, Svelte, Backbone.js, and Bootstrap for responsive and interactive user interfaces.
- Developed scalable codebases in JavaScript (ES6+) and TypeScript, following coding standards and best practices.
- Designed custom UI components and widgets using CSS3, Sass, and Less to enhance project aesthetics.
- Collaborated with back-end teams to integrate REST APIs and WebSocket for improved application functionality.
- Performed end-to-end testing with Mocha and Selenium to ensure robust, bug-free applications.

Education

University of Florida   Aug 2010 – May 2014

Bachelor of Science in Computer Science
